

CarterPumps

**COMPANY
OVERVIEW**

Clean

Pressure Boosting Applications

We offer a range of pressure booster sets that will meet the requirements of a single domestic dwelling to a high rise tower block. The applications don't stop there, we have sets that are ideal for irrigation, industrial and process too.

Ask us about variable speed drive and how we can reduce your energy bill.

Water Treatment and Filtration

Calcium, Iron, Nitrates, Chlorine, Particulates, Dirt, Rust, Sand, Silt, Bacteria, Cysts, Viruses, Fluoride, Chromium.... the list goes on! The fact is, we are able to offer treatment and/or filtration plant to ensure delivery of potable water to the best

possible quality. If you need ultra pure water for your process we have that covered too!

Water Abstraction

From sinking the borehole to installing and commissioning the borehole pump and controls you can rely on us to get your new water supply operational swiftly and effectively.

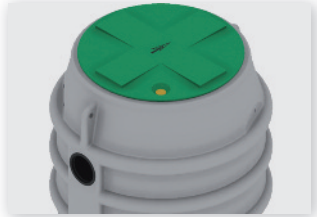

It is reassuring to know that we also provide pressure boosting, treatment and filtration services, if required.

Dirty

Pumping Stations

Sewage and wastewater pumping stations suitable for any application. Single or twin pump, above or below ground, single or three phase, macerating or vortex... the permutations are endless!

And if you need a superbly flexible telemetry system to monitor your station, ask us about our CNX system.

Pumps

We are able to supply pumps of any type swiftly and cost effectively. If you are unsure what type of pump would be most suitable for your application give us a call and we help.

Our aim is to get your system up and running as quickly as possible with the minimum of fuss.

Sewage Treatment

When it comes to sewage treatment plant size is everything. Too large or small and the microbiological process will fail to treat the effluent as required.

We are happy to visit site and discuss your application in detail to ensure we provide the perfect solution.

Let us help you with your Consent to Discharge application!

Ancillaries

Controls

From a simple starter or panel to a state of the art inverter based panel we have the experience and knowledge to specify, source and commission all your pump control requirements.

We also supply and install ultrasonic level controls and telemetry based monitoring systems.

Fittings

We stock a wide range of pipe fittings, clamps and flanges including malleable/wrought iron and stainless steel complete with nuts, bolts, washers, gaskets and jointing compounds.

Additionally we stock a WRC approved range of ABS and

uPVC valves, tube and fittings plus MDPE tube in various coil lengths plus a full range of poly fittings from 20mm to 90mm.

Accessories

Pressure vessels, ball and gate valves, non return valves, in line strainers, cam lever lock couplings, cable jointing kits, lay flat hose, MPDE pipe, flexible rising main, hose tails, starter boxes, pressure switches, pressure gauges, float switches.

Full Service Distributor

Supply

With access to all the leading pump, filtration and treatment plant manufacturers why go anywhere else? We are happy to guide you through the selection process and ensure that you buy the right pump for the job.

Whatever the pump, whatever the application, we would be delighted to quote.

Install and Commission

Carter Pumps Ltd are able to install and commission all types of pumps and pumping equipment from surface mounted pump sets, pressure booster sets, submersible sewage pump stations, submersible borehole pumps, pipe work, controls and

water treatment systems. And don't forget, we are SAFEcontractor and NICEIC accredited.

Maintain

We are able to maintain all types of pumping equipment and will programme your requirements at regular intervals to ensure the optimum reliability of your installation. In the event of breakdown we provide a 24/7 emergency service.

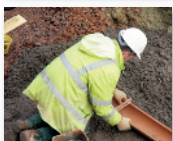

Ask about our Carter Pumps Planned Maintenance Contract.

Let us Introduce Ourselves!
